

What is claimed is:

1. A projection system, comprising:

5 a plurality of displays arranged adjacent to each other to form a screen,  
wherein a portion of adjacent displays overlap one another to form a seam;

a plurality of projectors, one corresponding to each display of the  
plurality of displays, wherein each projector includes a lens selected to reduce  
distortions at the seams formed between adjacent displays.

10 2. The projection system of claim 1 wherein the plurality of displays are arranged  
in an N x 1 array.

15 3. The projection system of claim 1 wherein each of the plurality of projectors  
further includes a mirror.

4. The projection system of claim 3 wherein the mirror is aligned at an angle of  
about 45 degrees with respect to a lamp of the projector.
